EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with David Okey on 10/24/2007.

The application has been amended as follows: Claims 55-60 have been amended so they each depend from claim 53 instead of 44.

Allowable Subject Matter

2. The following is an examiner's statement of reasons for allowance: the prior art of record fails or reasonably suggest a motor controller which includes two relational databases, one relating an expected electrical current value to either a position in the pump cycle or output volume of the pump, and the second relating an expected electrical current value with a sensor output such as an ambient temperature sensor, a backpressure sensor, an age of the motor and an age of tubing used in the infusion pump.

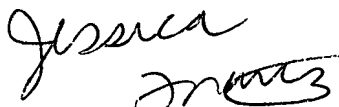

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
